

INTERNATIONAL RELATIONS

2024 - 2025

Indian Institute of Science Education and Research Bhopal

Director's Message

I am pleased to present the International Relations brochure of Indian Institute of Science Education and Research (IISER) Bhopal. IISER Bhopal, an Institute of national importance under the Ministry of Education, Government of India, was established on February 20, 2008, to promote education and research in science and related areas. The Institute aims to produce leaders in science and related disciplines.

Prof. Gobardhan Das
Director, IISER Bhopal

Situated on about 200 acres, the IISER Bhopal campus is a state-of-the-art education and research hub. It boasts lecture halls, a well-equipped central instrumentation facility, a library, computer facilities, research laboratories, meeting halls/auditoriums, and residential facilities for its community members. The Institute encompasses 10 academic departments spanning natural sciences, engineering sciences, and humanities & social sciences, along with several centers that support the learning and research endeavors of both students and faculty members. Our world-class faculty, together with our students—who are among the best minds in the nation—are well on their way to building an Institute of excellence that will stand the test of time.

IISER Bhopal looks forward to enhancing global engagement and exploring opportunities for new collaborations and partnerships with Universities and Institutions of International repute. The International Relations Office encourages students across the world to apply to our academic programs and internship opportunities. The office is headed by the Dean of Alumni & International Relations and the Associate Dean of Alumni & International Relations, with a dedicated team providing all necessary support to international visitors, faculty, and students.

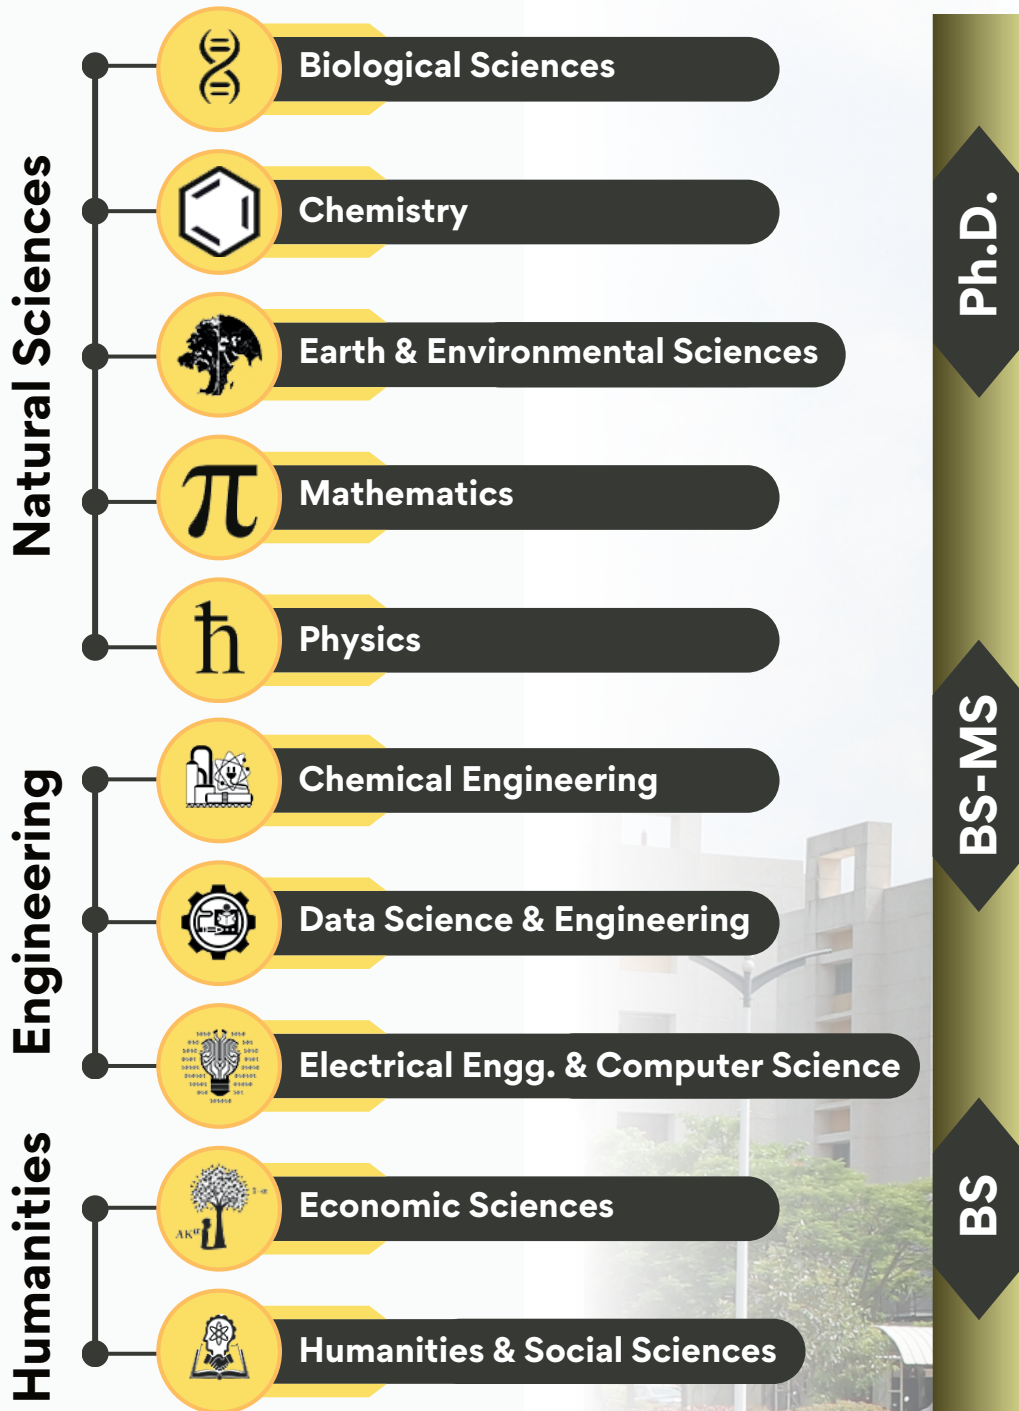

The Institute is steadfast in its commitment to creating an atmosphere that nurtures innovation, creativity, and excellence among our students. Looking ahead, in alignment with our motto 'Vidyayā amṛtaṃ aśnute' (Be immortal through knowledge), I am confident that IISER Bhopal will persist in its brilliance, shaping the future by producing the next generation of research leaders and innovators, dedicated to serving not only the nation but the entire world.

Looking forward, I welcome you all to explore this booklet to get a glimpse of international activities and to be a part of our exciting journey.
